DETAILED ACTION

The Amendment filed September 23, 2002 has been acknowledged.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321 may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 35, 36, 38-41, and 44 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 7-24 of U.S. Patent No. 6,250,747. Although the conflicting claims are not identical, they are not patentably distinct from each other because Hauck ('747) claims the required structural limitations for performing the method of regulating pressure claimed in the present application. It would have been obvious to modulate the first, second, and third

valves of Hauck ('747) for activating the first, second, and third fluid flow in response to the gauge pressure in the reservoir.

Response to Arguments

3. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
